CONTENTS OF VOLUME 353

August 1984

NOBLE Denis Review Lecture. The surprising heart: a review of recent progress in cardiac electrophysiology. 1

CHAMLEY W.A. & PARKINGTON Helena C. Relaxin inhibits the plateau component of the action potential in the circular myometrium of the rat. 51

LAW R.O. Characteristics of ionic binding by rat renal tissue *in vitro*. 67

APPENTENG K. & PROCHAZKA A. Tendon organ firing during active muscle lengthening in awake, normally behaving cats. 81

MORLEY J. & SANJAR S. Autonomic regulation of mucociliary transport rate in the oesophagus of the frog, *Rana temporaria*. 93

BROWN D.A., DOCHERTY R.J. & HALLIWELL J.V. The action of cholinomimetic substances on impulse conduction in the habenulointerpeduncular pathway of the rat *in vitro*. 101

HUTTER O.F. & RANKIN A.C. Ionic basis of the hyperpolarizing action of adenyl compounds on sinus venosus of the tortoise heart. 111

GORMAN A.L.F., LEVY Simon, NASI Enrico & TILLOTSON Douglas Intracellular calcium measured with calcium-sensitive micro-electrodes and Arsenazo III in voltage-clamped *Aplysia* neurones. 127

BIXBY John L. & SPITZER Nicholas C. The appearance and development of neurotransmitter sensitivity in *Xenopus* embryonic spinal neurones *in vitro*. 143

CHAMINADE M., FOUTZ A.S. & ROSSIER J. Co-release of enkephalins and precursors with catecholamines from the perfused cat adrenal gland *in situ*. 157

ANDREW R. David & DUDEK F. Edward Intrinsic inhibition in magnocellular neuroendocrine cells of rat hypothalamus. 171

KOEHLER W.J., SCHOMBURG E.D. & STEFFENS H. Phasic modulation of trunk muscle efferents during fictive spinal locomotion in cats. 187

CONTI F., HILLE B. & NONNER W. Non-stationary fluctuations of the potassium conductance at the node of Ranvier of the frog. 199

GUNDERSEN C.B., MILEDI R. & PARKER I. Slowly inactivating potassium channels induced in *Xenopus* oocytes by messenger ribonucleic acid from *Torpedo* brain. 231

STONE Susan & WITKOVSKY Paul The actions of γ-aminobutyric acid, glycine and their antagonists upon horizontal cells of the *Xenopus* retina. 249

LAKIE M., WALSH E.G. & WRIGHT G.W. Resonance at the wrist demonstrated by the use of a torque motor: an instrumental analysis of muscle tone in man. 265

OETLIKER H. & SCHÜMPERLI R.A. Birefringence signal and early mechanical changes at normal and increased tonicities in frog skeletal muscle. 287

KIMURA Fukuko & TSAI Cheng-Wei Ultradian rhythm of growth hormone secretion and sleep in the adult male rat. 305

CRONE Christian Lack of selectivity to small ions in paracellular pathways in cerebral and muscle capillaries of the frog. 317

PELL J., PHIPPS R.J., WELLS U.M. & WIDDICOMBE J.G. Control of mucoglycoprotein output from the rabbit nose. 339

JENESKOG T. & PADEL Y. An excitatory pathway through dorsal columns to rubrospinal cells in the cat. 355

ANDREEV A.A., VEPRINTSEV B.N. & VULFIUS Catherine A. Two-component desensitization of nicotinic receptors induced by acetylcholine agonists in *Lymnaea stagnalis* neurones. 375

DONALDSON R.M., NASHAT F.S., NOBLE D. & TAGGART P. Differential effects of ischaemia and hyperkalaemia on myocardial repolarization and conduction times in the dog. 393

JONES H.C. & TAYLOR C.M. Absorption of the cerebrospinal fluid and intracranial compliance in an amphibian, *Rana pipiens*. 405

ADRIAN R.H. & HUANG C.L.-H. Experimental analysis of the relationship between charge movement components in skeletal muscle of *Rana temporaria*. 419

HUDLICKA O. & TYLER K.R. The effect of long-term high-frequency stimulation on capillary density and fibre types in rabbit fast muscles. 435

MATTHEWS Peter B.C. Observations on the time course of the electromyographic response reflexly elicited by muscle vibration in man. 447

MARTIN Kevan A.C. & WHITTERIDGE David Form, function and intracortical projections of spiny neurones in the striate visual cortex of the cat. 463

ADAM-VIZI Vera & LIGETI Erzsébet Release of acetylcholine from rat brain synaptosomes by various agents in the absence of external calcium ions. 505

BROWN J.E., KAUPP U.B. & MALBON Craig C. 3′,5′-cyclic adenosine monophosphate and adenylate cyclase in phototransduction by *Limulus* ventral photoreceptors. 523

CLAPHAM David E. & NEHER Erwin Trifluoperazine reduces inward ionic currents and secretion by separate mechanisms in bovine chromaffin cells. 541

ALMERS W., MCCLESKEY E.W. & PALADE P.T. A non-selective cation conductance in frog muscle membrane blocked by micromolar external calcium ions. 565

ALMERS W. & MCCLESKEY E.W. Non-selective conductance in calcium channels of frog muscle: calcium selectivity in a single-file pore. 585

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

26–27 *March* 1984

University College London Meeting

DEMONSTRATIONS

Attwell David & Gray Peter Use of patch-clamp recording to study salamander photoreceptors. 2*P*

Chapman S.J., Edwards R.H.T., Greig C. & Rutherford O. Practical application of the twitch interpolation technique for the study of voluntary contraction of the quadriceps muscle in man. 3*P*
